

Corporate Profile

Message from the MD

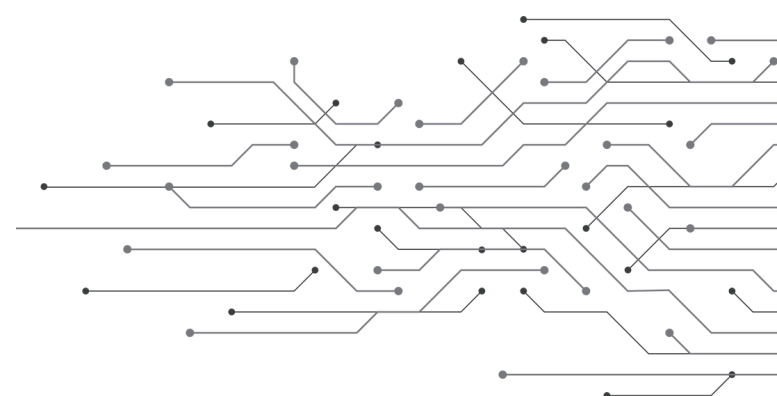

Growth based on innovation, hard work, and expansion!

Our company has achieved remarkable progress in Networking, Security & Surveillance, since its inception in 2011. We have been successful in maintaining strong business partnerships and this, in turn, has provided us with the opportunity to sustain a sophisticated business structure. Today, not only have we been keeping this motto firmly in mind, we have incorporated the concept of excellence in innovation in our principle of operation. We strive to be the best in what we do.

Our pursuit for innovation is the motivating force that drives our company to grow. Through change, we feel our products and services will diversify and provide us with the opportunity to enjoy an elevated status in the security and surveillance market.

As the leading figure of the company & having such distinct tradition and values, We are blessed with vast field-related expertise, proven market intelligence, organizational resources, and the most important of all, our company's goodwill. These, together with our valuable human asset – our teams of highly motivated professionals, form the base of continuous growth.

- Product Reliability
- Innovation
- Technology Savvy
- Dynamic Culture
- Stocking Capabilities
- Dexterity
- Experience
- Quality
- Right Balance between Marketing & Service • Customer Centric Approach
- Extensive Project Support

WHAT WE DO?

VOXTEL is a passive system integrator that caters to the ICT and security market. We are prudent in periodically re-assessing your approach to the most fundamental aspect of protection – “Electronic Security.”

How do we Work?

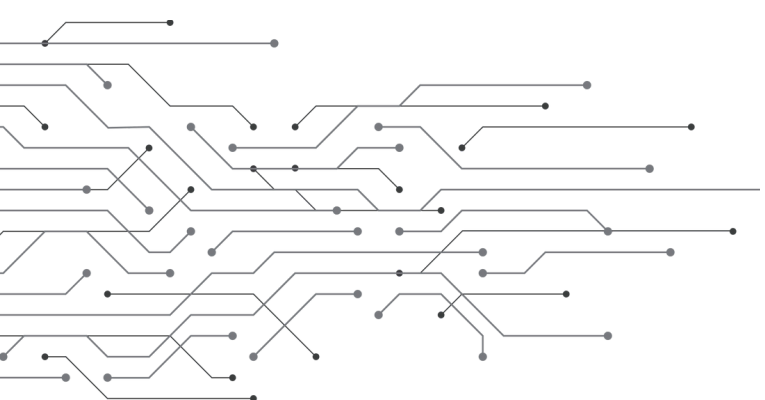

Our four main pillars are as stated below

1. Prospect & Analyze
2. Present & Recommend (products) – Cost Optimization
3. In House PM process
4. Timely Delivery and Maintenance

VOXTEL Innovative Solutions concept

We are “Design-Build” Integrator having enough potential to cater to large enterprises and just not any Value added Re-seller’s looking to compete in the market. We are capable of supporting security operations @ every phase of its life cycle. Voxtel is encouraged through the following concepts and acts on its merits.

- Security Risk/Client Need Assessment
- Life Cycle Analysis/Maintenance
- Scalable Platform (Expansions)
- HD Empowerment (Performance)
- FTK/Systems Engineering/Design
- Reliable Systems (Cost Economic)
- Open Platform (Data Access & Control) Wider Applications/Broad Access Of Partners

CCTV Foreword:

Safety and Security in the workplace are of utmost importance, no matter what type of business it is. By making use of specific security features such as CCTV cameras, you are improving not only the workplace itself, but also the comfort of the employees, and thus your business overall.

Our alliances with industry's front-runners such as AVIGILON, CANDID & AXIS help us establish "secure" areas & assist with some of the most distinguished projects in the country. VOXTEL is highly capable of promoting a wide array of CCTV Solution.

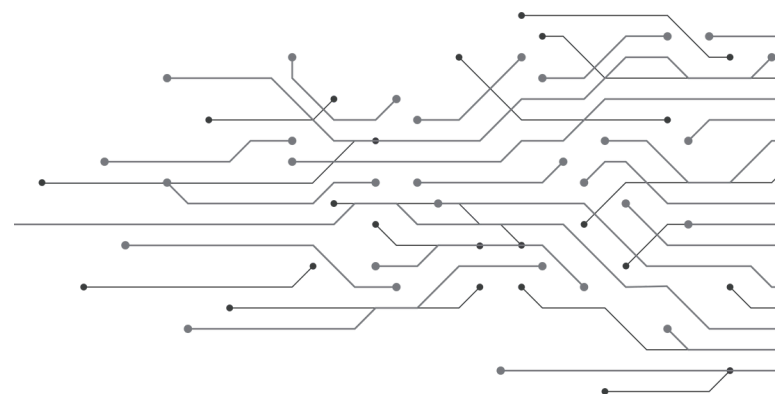

- Staff & Intruder monitoring
- Data recording
- Improve work strategy condescend
- Asset Protection (keeps an eye on things overall)

Annual Maintenance Contracts:

Whichever systems you use, regular security maintenance is vital for making sure your systems are in full working order. VOXTEL has a dedicated service team guaranteeing routine systems maintenance at the right intervals (service periods), check on system compliance and essentially alleviate the pain of having to remember (especially if you are a customer) – Whether its technical support, routine maintenance or replacements etc.

- We provide two types – Comprehensive (includes repair and replacement) & Non-Comprehensive (call based, doesn't include repair and replacement)
- What does our exemplary AMC service include?
- Check the history of CCTV system since last maintenance service
- Check all CCTV control equipment (monitors, DVR, Multiplexer, etc.)
- Periodic PPM Service
- Spare Part Managements
- 24x7 Call Center
- Check and clean cameras, lenses (adjustments and view correction) and housings as necessary.
- Check recording and playback quality
- Repair faults as and when necessary
- Log test results and conform CCTV status to operational

Maintenance Features:

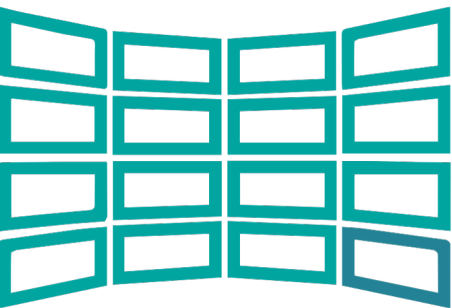

We assign project specific engineers to handle operations and maintenance especially if the number of cameras exceeds 200 units
 reventive Maintenance: schedule visit to conduct general checks on the system as recommended by the manufacturer

Standby support/Corrective Maintenance: We can provide 7/24 Standby support and keep system breakdown time to a minimum.

- Preventive Maintenance schedule visit to conduct general checks on the system as recommended by the manufacturer.
- Standby support/Corrective Maintenance We are able to provide 7/24 Standby support and keep system breakdown time to a minimum

Access Control Foreword:

Inadditionto improving safetyand security through surveillance, implementing access controls offers additional benefits. At VOXTEL we provide a particular range of high-end products that target a full scale of customers.

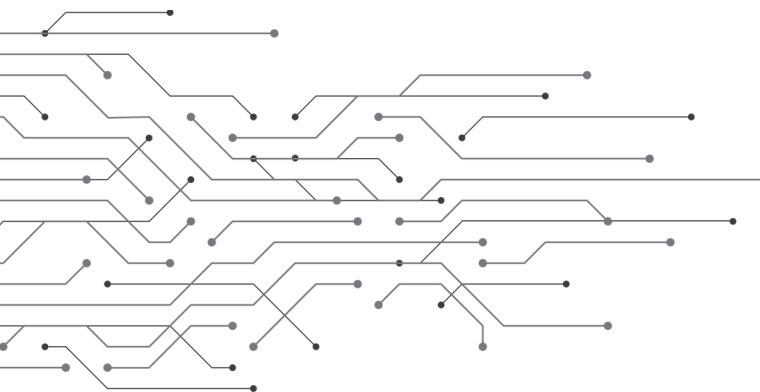

Video wall foreword:

Globally,video-wall sales are expected to surpass 20\$ Billion in only a few years representing a significant chunk of the overall AV industry. The logic behind is to have a high reach and a flashy display of content for mass-communication. VOXTEL has a dedicated team of engineers specializing in this segment offering limitless dynamic content along with advanced features.

Turnstiles:

A turnstile or entrance control system is designed to deter or completely stop unauthorized entrants while enforcing the use of an access control system to ensure the 'one token one person' rule applies. Security levels vary depending on style and type of products. Some of the brands we offer can integrate with many peripherals (card readers, biometrics, cameras, people counters and building management systems, etc.).

Video Analytics:

Video Analytics is nothing but "computers overlooking cameras watching different people." At any given time VA's can monitor 100's of cameras at once and provide perspectives that humans leave out. VOXTEL's Video Analytics team engulfs in providing focus oriented systems that are "smart" "remotely accessible" "provides controlled access" "assist with storage" "reduce liability through improved security."

However complex the design, our engineers are, trained in developing the writing program to suit your needs.

Structured Cabling:

With structured cabling, multiple electronic devices, such as computers and telephones, are connected by the technological infrastructure of the cabling system. There are many reasons why so many business owners choose this type of cabling systems.

- For simplicity
- Flexible solutions (reduces repairs)
- Adaptability
- Cost-effective solution
